MACHINING TECHNICS

Diploma of Vocational Studies (DVS)
1800 hours

The machinist

What does he do?

The machinist manufactures and modifies parts with precise dimensions using conventional and CNC machine tools.

He leads a variety of machine tools to manufacture parts and performs manual machining tasks. He plans, organizes, produces and ensures quality control of all machined parts.

Examples: machinery, engines, turbines, gears and much more.

This job is for you if...

- you have a great sense of responsibility and a spirit of analysis
- you are methodical and have an eye for detail
- you have good spatial perception and manual dexterity

Prerequisites

- hold a high school diploma (DES)
or
- must be at least 16 years old and have successfully completed Secondary 4 in French, in English and in Mathematics or have a recognized equivalent learning

Workplaces potential

- machine shops
- manufacturers of aircraft, engines, landing gear and flight simulators
- metalworking industry, avionics, electrical, chemical, medical, petrochemical etc.

Average salary between \$14 and \$24/hour
