AIRCRAFT STRUCTURAL ASSEMBLY

Diploma of Vocational Studies (DVS)
975 hours

The Structural Assembler

What does he do?

A Structural Assembler manufactures, assembles, installs and adjusts the parts that make up the structure of an aircraft. He performs machining operations and riveting of composite materials.

Examples: fuselages, cockpits, wings, ailerons, landing gear doors, and engine mounts.

What are his main duties?

Using drawings, diagrams, templates and specialized tools, he will assemble structural parts of aircraft.

This job is for you if...

- you enjoy teamwork and problem solving
- you are manually skilled, attentive, careful, persistent and organized
- you have a sense of responsibility, observation and analysis

Prerequisites

- hold a high school diploma (DES)
or
- be at least 16 years old and have successfully completed Secondary 4 courses in French, English and Mathematics or have recognition of equivalent learning

Workplace potential

- manufacturers of airplanes, helicopters and flight simulators
- companies specializing in the maintenance and repair of aircraft
- subcontractors specializing in the manufacture and assembly of parts

Average salary between \$14 et \$29.50/hour

* This training is also given in Mirabel
